Indicates additional features

The MasterCool Series Redefines Food Preservation

BrilliantLight Pro

Flush-fit LED lighting in the side panels, top frame, and backwall flood the interior with bright, even illumination – so everything is easy to see and beautifully showcased.

SmartLight

No more blinding fridge light at night. Every model is equipped with a light sensor that automatically adjusts its brightness.

M Touch Pro

New user interface with large high-resolution full-touch display that is conveniently positioned at the centre of the appliance. Integrated tips for ensuring effortless maintenance such as changing the filter.

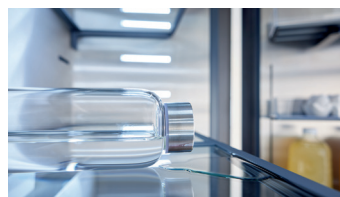

Gallon Bins

To prevent spills, open bottles are best stored upright. The new gallon bins make it easy to store even large containers in the door, keeping them accessible while freeing up shelf space.

Internal Water Dispenser

Seamlessly integrated water dispenser on the left side panel, providing cold, fresh water at any time. Thanks to the built-in filter, the water is always clean and ready to drink. Dispense manually or pre-set your favorites for your preferred glass or bottle size.

Spillproof Shelves

Spills and leaks are contained by the aluminum-framed glass shelves, preventing messes and making cleaning quick and easy. The shelves are height-adjustable and, depending on the model, available as full-width or split versions for flexible storage.

MaxLoad Hinge

Ensures safe storage of large amounts of food in the door shelves, while also offering flexible options for door panel materials.

FoodView

Up to four cameras inside the appliance capture images of key areas, including drawers, whenever doors are opened and closed. Viewable via the Miele app, these images help simplify shopping and reduce food waste.

Longlife AirClean Filter

For food storage in an odor-free environment. This innovative filter system combines an active charcoal filter integrated into the rear panel of the appliance's air circuit, effectively neutralizing odors. It is regenerable – cleanable up to five times in an oven – and only needs replacement every three years, hence reducing waste.

Freeze&Cool

Features a temperature range of +39.2° F to -0.4° F and 5 pre-set settings for maximum flexibility.

Dual IceMaker

Produce two different types of ice cubes (small and large) at the same time!

IceMaker

Always have daily, fresh ice cubes on hand. For ultimate convenience, use the included ice scoop.

MasterFresh Pro

Now standard in all models, MasterFresh Pro optimizes freshness by keeping food fresh up to 5x longer. It automatically adjusts humidity based on food type, ensuring ideal conditions and less waste.

DailyFresh ExtraCool

Fruit and vegetables stay fresh up to twice as long with the spacious and extra drawer. Featuring a temperature at approx. 35.6° F lower than the set refrigerator temperature – it's the perfect place for meat, fish and dairy products.

SlidingShelf

Store small items within easy reach without using much fridge space. Attached beneath a glass shelf, the sliding box keeps items organized and easily accessible without stacking.

Specifications for all models available at [mieleusa.com](https://www.mieleusa.com).

3 Installation Options for Every Kitchen Style

All bottom-mount models can be installed flush with either a custom kitchen cabinet panel or an optional stainless steel panel. Alternatively, a proud installation is possible for all models; this option requires additional accessories such as stainless steel front panels, handles, and frame sets.

1. Flush with Kitchen Cabinet Panel

2. Flush with Stainless Steel Panel

3. Proud in Stainless Steel

MasterCool Accessories

Miele is proud to offer dedicated panels, handles and frames for every bottom-mount model in the MasterCool lineup. For a full list of available accessories, visit mieleusa.com.
