Q1 2026 Newsletter: Product Updates

HBN5, HBN22, HBN3 SERIES REDESIGN

New in 2026, BEST® is introducing redesigned versions of the HBN5, HBN22, and HBN3 Built-In Series hoods that will allow you to remove the side trims, if necessary for your installation.

The current version of these units cannot be installed in applications where they are recessed inside of a standard-size cabinet due to the permanently affixed side trims.

By making this design change, these units will have the ability to be installed into virtually any application—flush or recessed—making them an even more flexible ventilation solution. BEST® still recommend installing the unit flush with the bottom of the cabinet with all four trims installed to maximize performance and capture, protect cabinetry, and provide a more finished look.

Front and back trims will remain removable, and all features, and technology will remain the same. The redesigned units are anticipated to be available by the end of March.

Flush with Trims Installed
(Recommended)

Recessed with Trims Removed

Removable Side Trim
Close Up

NOTE: The BEST model numbers will remain the same; the Commerce Cloud SKU number will change. These details are in the new Price List excel version shared with the January 2, 2026 price increase announcement.
