

MARBLE
MASTERY

WATERWORKS

Marble has defined many of the world's most revered spaces for centuries, from Roman baths to Renaissance palaces to iconic modernist homes.

It is a material that commands respect and connects us to history. We honor marble's legacy by reimagining bath fixtures for both primary baths and powder rooms.

At Waterworks, we stay curious, push boundaries, and never settle, obsessing over every detail. We combine materials, talent, craftsmanship, and technology in ways others wish they could, and then we perfect it.

This is how we approach a material that has shaped design throughout history.

Singular blocks of marble. *Sourced and fabricated in Italy.*

We take on the complexities of sourcing and fabricating thick slabs, carved sinks, and bathtubs. By working directly at the source, we unite the finest Italian marble with US and UK workshops crafting brass, bronze, and steel bases—all under a singular design vision.

The result is a resolved, architectural solution where every element works together with intention.

CARVED MARBLE BATHTUBS

We've created exceptional bath fixtures, each carved from a single block of Italian marble and shaped with notched backsplashes, integrated overflows, seamless junctions, carved edge details, and The Waterworks Cut, a substantial 5 cm washstand and vanity counter surface.

Working from full blocks allows multiple elements of a fixture to be formed from a single stone, creating a sense of continuity that carries through the entire piece or pieces.

Introducing
The Waterworks Cut.
A new standard.

Waterworks is now setting a new standard: Each washstand and vanity is crowned with The Waterworks Cut, an indulgent 5 cm counter surface carved from a single block of marble, its unapologetic thickness a declaration of permanence.

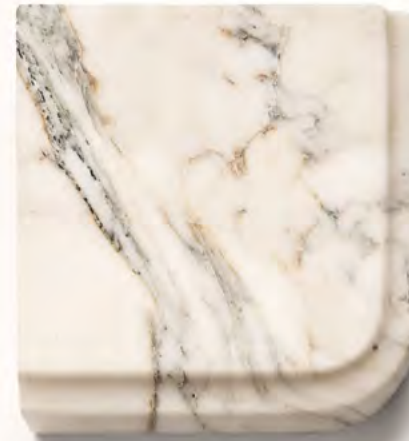

A select collection of superior Natural Marble.

Our blocks of marble are chosen not just for color, but for movement and depth, the qualities that reveal the hand of nature.

Each cut is one of a kind with its own story—a veining pattern and tonal shift that belong to it alone.

This individuality shapes our entire palette of eight curated marbles. From these blocks, we cut and carve to our exacting dimensions, aligning veining across surfaces, preserving the integrity of the original stone, and creating a harmonious relationship between individually unique pieces.
