

## ESTIMATED LEAD TIMES

Please note that we do not offer mass produced faucets, but high quality, custom built-to-order faucets. You can order any handle with any spout, in any finish. As a result, lead times vary depending upon the style and plating choices.

With over 25 spout and handle options, and more than 30 finishes, there are over 2 million unique design options for widespread faucets alone. This unique flexibility allows the customer virtually unlimited design choices, but may sometimes make lead times less accurate than mass produced product.

**Therefore, please advise your customers at the time of order that all lead times are estimates.** While we usually ship faster than the estimated lead-time, occasionally an unforeseen circumstance causes a lead-time to be exceeded. We're happy to report that this is the vast exception to the rule.

Please note that unless instructed otherwise, we ship & backorder.

**If you prefer an order to ship complete, simply note it on your P.O.**

Thank you for your understanding. As always, we look forward to serving you!
