**Delivery time reductions for core assortment items; New products from the ISH 2009 available to order again;
Showroom display orders accepted again,**

Dear Ladies and Gentlemen,

In the past weeks you have heard from us about the reconstruction progress at the factory and the resumption of production. Four weeks ago we started shipping our concealed rough parts again.

This means that all the preparations for the first delivery of products in the Tara., Meta.02, MEM and Symetrics series have been completed. We are pleased to inform you that deliveries will be made on time as scheduled starting on 10/12/2009.

We have further positive news for you today concerning the development of Dornbracht's core assortment and the significant reductions in our delivery times. We can also tell you that we are once again accepting orders for showroom display products.

Orders for 2009 novelties accepted again

Apart from a few exceptions, this year's trade fair Supernova and Villeroy & Boch LaFleur novelties will be available to order in polished chrome from 10/01/2009 as part of Dornbracht's core range. This means that we are now accepting orders for core assortment items in these series. Shipments for these products will commence by mid-February 2010.

Showroom display orders accepted again

From 10/01/2009, you can also start sending us your showroom display orders for core assortment items again. We were unable to accept showroom display orders during the initial start-up phase so we could focus instead on the production and fulfillment of consumer orders.

The same delivery times apply for display orders as for your standard orders.

Delivery time reductions for core assortment items

From 10/01/2009, there will be significant reductions in the delivery times for our core assortment:

Concealed rough parts	from 4 weeks	to	3 weeks
Tara., Meta.02, MEM, Symetrics	from 10 weeks	to	8 weeks
Madison, Lulu	from 16 weeks	to	12 weeks
Villeroy & Boch Square, Cult	from 16 weeks	to	12 weeks

We had to split our Balance Modules in line with these delivery time reductions: stainless steel items and concealed rough parts, can be delivered within three weeks.

We will adjust the delivery times for items with a polished chrome finish in the Tara., Meta.02, MEM and Symetrics series, and confirm them at eight weeks delivery.

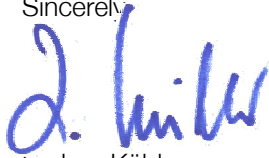

Enclosed are further documents that describe the new extended core assortment and the corresponding delivery times (enclosure 1), and a list of alternative items for products that are currently not included in our core assortment (enclosure 2).

Two index price lists (one numerical, the other organized by series) that are intended to support you in your consultation and specification tasks, as well as other relevant details can be downloaded from the information section on Dornbracht Professional (www.dornbracht-professional.com). If you do not yet have access, please contact one of our staff members, who will be pleased to help you.

We would like to take this opportunity to thank you for your support over the recent weeks, and look forward to sharing further positive news regarding developments at Dornbracht with you shortly.

Sincerely,

Ludger Kübber
Chief Sales Officer
