

Ask Andre

Q: Is there an extension kit available for my valve and how do I order it?

A:

Watermark has extension kits available for ALL of its valves. Furthermore, all of our valve bodies and extension kits have been universally designed to work with all of our more than 100 handle trims. Our extension kits are not handle trim specific so you don't have to worry about ordering the wrong kit.

Shower Systems

	MODEL NO.	DESCRIPTION	NOTES
	SS-EXT80	extension kit for SS-PB70	
	SS-EXT85	extension kit for SS-PB80	
	SS-EXT90	extension kit for SS-THK5000	not stackable please specify finish

There are two easy ways to locate the right extension kit in both our catalogue and on our website, www.watermark-designs.com. On page 347 of our catalogue, there is a list showing all of our extension kits. Every extension kit has a model #, photograph, and a description indicating what valve it will work for. In addition, in every collection where a valve may be ordered separately from the trim, the valve and extension kit are broken out and listed individually (see below.) This way, if you need to order an extension kit after the entire job was ordered and delivered, you can go back to the same spot you ordered the trim and find its respective

extension kit.

	MODEL NO	DESCRIPTION
Shower Sets		
	27-6.3- ____	single handle pressure balancing valve system
	SS-PB70	valve only for above
	27-6.3TO- ____	trim only for above
	SS-EXT80	extension kit for above
+ View Details		

Our website works similarly whereby all of the extension kits are databased and may be viewed as part of our Shower Systems Collection or as part of each series.

Some additional notes about our extension kits for your reference are:

- All extension kits are in stock in our factory in New York as well as our distribution center in Northern California for same day shipping.
- All extension kits are stackable and able to be cut back with the exception of our thermostatic kits (SS-EXT40, SS-EXT50, and SS-EXT55C.)
- All extension kits are rough components that do not require a finish to be specified with the exception of our thermostatic kits (SS-EXT40, SS-EXT50, and SS-EXT55C.)
- The length of all extension kits are 1" with the exception of the ¾" volume control kit (SS-EXT10) which is 1 ¼" and thermostatic kits (SS-EXT40, SS-EXT50, and SS-EXT55C) which are adjustable from 7/8" to 1 ¼".
- The F,G, T8, T9, U3, U5, and U7 handle trims require a smaller head screw for the SS-EXT10 - SS-EXT30 and SS-EXT60- SS-EXT90 extension kits. Please specify these handle trims when ordering these kits. Otherwise, the head of the screw may be filed down in the field.
- Watermark has the capability to customize extension kits for those odd plumbing situations that may arise so you can sell with confidence.

If you have any questions, please feel free as always to call me or any of my colleagues and we can further assist you.

Thank you to all for your continued suggestions for future topics to be addressed. Please keep them coming.

Warm regards,
Andre
