

# Sales Bulletin

BULLETIN NO: 320  
DATE: November 24, 2009  
TO: Sales Team  
FROM: Marketing  
SUBJECT: Grotherm 1/2" Thermostatic Rough-in Valve

---

Introducing a new competitively priced Grohtherm ½" thermostat rough-in valve (34 331 000) featuring GROHE TurboStat technology! This new thermostat valve leverages our existing pressure balance valve casting and is designed to replace the existing Grotherm 34 122 and 34 123.

If that isn't enough, here's the big news! For the first time, we have a thermostat that does not require a reverse cartridge for back to back installation or for reversed hot/cold connections.

## Key Details:

- 34 331 000, List Price: \$249.00
- Available and in stock immediately.
- Fits all non-integrated thermostat trims.
- For those currently experiencing backorder issues on 34 122 – this may be the ideal alternative.
- The permanent phase out date on 34 122 and 34 123 is March 31, 2010.

The pdf sell-sheet on the new Grohtherm 34 331 000 is attached.
