

Introducing the new 96" Shower Wall Kits and 62" x 96" Wall Panel.

We've gone taller and wider to fulfill the requests of homeowners, architects and contractors with the introduction of our new wall panel and shower wall kits. The SS-6296-1 wall panel fits spaces 62" wide and reaches a full 96" high. This single wall panel eliminates the need for a batten strip and provides a smooth floor-to-ceiling transition.

Four new shower wall kits are also 96" high. Each "Multi-Kit" has been designed to fit multiple shower floor sizes, including ADA compliant floors. Both new products provide additional material to make trimming easier when fitting a desired height or width.

To learn more about the new panel and multi-kits, visit swanstone.com.

New Product Benefits

- Seamless, floor-to-ceiling appearance without the use of a batten strip
- 62" wide panel provides additional material to trim-to-size
- Each kit is designed to fit a variety of shower floor sizes, including ADA compliant
- Available in an extensive palette of solid and aggregate colors
- Both products made from Swanstone, the high performance solid surface solution
