

Step Two: Select the Steam Generator properly sized for your installation.

All Steamist Steam Generators have a stainless steel tank for years of dependable service, and are factory-tested before shipment to meet Steamist's high-quality standards for energy-efficient, money-saving operation. All generators are UL Listed.

TSG Total Sense™ Steam Generators

Can be installed with one or more Total Sense Collection Spa Options.

Three models cover all steambath sizes – multiple generators are easily “gangable.”

Selectable InstaMist™ feature provides quick-response steam in seconds.

Proportional controlled steam modulated to precise steam shower requirements.

Quiet, continuous “Even Steam™” output.

Auto Drain designed to work with InstaMist feature – can be purchased individually or as part of TSG Control Package.

See page 10 for Total Sense Controls.

Model No.	Maximum Cubic Foot Range	Voltage	Product No.	List Price
TSG-7 (7.5 kw)	250	240	7520	\$1950
		208	7521	
TSG-10 (10 kw)	450	240	1020	\$2400
		208	1021	
TSG-15 (15 kw)	675	240	1520	\$2700
		208	1521	

For larger cubic foot requirements combine Total Sense generators together.

For complete electrical specifications and dimensions on all Steamist generators, see page 15.

Note: See page 15 for 3-Phase options. Price is the same as single-phase listed in both charts.

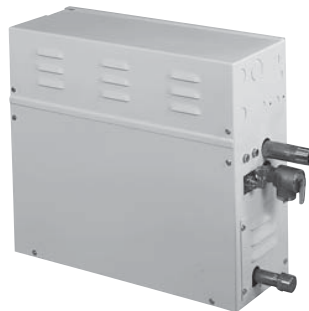

SM Steam Generators

Not compatible with Total Sense Collection components.

Auto Drain may be ordered and installed in the field on all “SM” Model steam generators.

Auto Drain can be purchased individually (see page 14) or as part of SM Control Package (see page 12).

See page 11 for SM Controls.

Model No.	Maximum Cubic Foot Range	Voltage	Product No.	List Price
