

BALDWIN[®]

PRODUCT CHANGE MEMO

July 12, 2010

Dear Baldwin Customer,

In an effort to continually enhance our product line, we will be introducing a new 2.125" Pre-Drilled Door Adaptor. Beginning September 1, 2010 the new adaptor, 6502.009, will replace the existing 5185.009 adaptor used today on the Estate product line. Additionally, this new adaptor will also replace the threaded adaptor used on the Images product line.

With the consolidation of these two adaptor designs, the 6502.009 will be able to:

- Support both the Estate and Images threaded roses
- Support both the Estate and Images interior latches
- Increase installation strength for both Estate and Images products
- Leverage the larger #10 Estate screws for both Estate and Images product.

Included in this memo, you will find details about the change including pictures, new installation images, and an overview of the features.

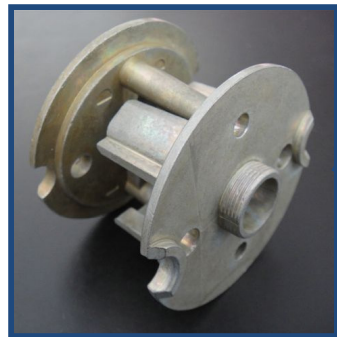

Please share this information with your associates and feel free to contact your Baldwin sales associate with any questions.

Thank you for your continued support of Baldwin.
