

Bluetooth is Here

Hello from ThermaSol!

As you know, ThermaSol®'s Serenity Light & Music System and Standalone Light & Music Packages are now fully loaded with Bluetooth® technology "standard." It's one of the latest examples of how ThermaSol continues to bring you engineering at its best and luxury at its finest.

For those of you who are still wondering how the technology works, it's easy: just sync your Bluetooth-enabled device to ThermaSol's Light & Music System, and it picks up the signal and starts playing the tunes almost instantly. And for those of you who are wondering if the Light & Music Systems sold prior to 6/1/11 would be upgradable, the answer is "YES!"

Here is the procedure to follow to upgrade:

- If a customer can provide proof of purchase that their Serenity Light & Music System or Standalone Light & Music Packages was purchased between 3/1/2011 thru 6/1/2011, ThermaSol will provide a BlueTooth upgrade kit at NO CHARGE. (Residential Only).
- If a customer does not have proof of purchase, they can purchase ThermaSol's BlueTooth Upgrade Kit for \$58.00/NET + shipping. Part number is: 10-8095-1 (in stock now and ready to ship!).
- This is a great opportunity for you to reach out to your ThermaSol clients, both new and old, and possibly generate additional business.

Please contact me directly at mike.straw@thermasol.com with any questions, or if you are interested in displaying ThermaSol's 100% Digital Superior Steam Systems in your showroom.
