

DCS French Door Refrigerator

Model Information:

SKU: 22635
 Model: RF195AUUX1
 UPC Code: 8228843226351

Capacity:

Refrigerator volume: 13.8 cuft
 Freezer volume: 5.7 cuft
 Total volume: 19.5 cuft

Product Dimensions:

Height: 70"
 Width: 35 5/6"
 Depth: 28 1/2"

Performance Features

- Active Smart™ Technology
- Energy Star Certified
- Frost free freezer
- Humidity controlled produce bins
- Full extension deli drawer

Usability Features

- Integrated in-door water dispenser
- Built in automatic ice maker with ice bin & scoop
- Internal filtration system for ice & water
- Half width gallon door shelves
- Covered door shelves
- 31" wide cantilever glass shelves
- Full extension freezer drawer
- Door alarms & interior lights for both compartments

Features	Benefits
Active Smart™ Technology with two variable speed fans and door & temperature sensors, provides fast cooling and freezing while maintaining even temperatures throughout both compartments.	Active Smart™ responds to your daily use and the climatic conditions to create the perfect storage environment, optimizing food freshness & quality.
Adaptive defrost collects information regarding daily usage patterns, the quantity of food stored and the ambient kitchen conditions.	The refrigerator uses this information to defrost only when necessary, thus saving you energy and money.
Humidity controlled produce bins have a specially designed lid that seals the fruit & vegetable bins, creating a humid environment that prevents produce drying out. The lid also retains moisture to prevent rotting. The dual humidity slides allow you to set the bins to fruit or vegetable settings.	By creating a humid microclimate the storage life of fresh fruit and vegetables is extended. It helps to retain crispiness as well as essential vitamins, minerals and dietary fibre.
External water dispenser to access chilled water through the door & internal filtration system located at the top rear of the refrigerator.	The unique design provides chilled water through the door without losing internal door space. The location of the water tank and filter gives optimum cooling and easy accessibility for replacement.
Built-in automatic ice maker & adjustable ice storage for one of the largest ice storage capacities on the market.	Ice cubes are made and accessed easily through the freezer compartment. With adjustable bins the storage volume of ice can be customised based on your demand.
Maximum capacity with French door design	Double central-opening doors allow for easy viewing, fast access and storage of large items like platters
Full extension freezer drawer	An ergonomic solution to frozen food storage.
