

WE'VE GOT LEGS

In an industry where every detail is designed, down to the last escutcheon, it makes sense that even the console legs chosen for a vanity would be subject to an architect or designers critical eye. Tapered, turned, straight, bowed; console legs define the look of the vanity in a way that says, "done to perfection."

Devon & Devon and Watermark Designs are both noted manufacturers whose exquisite console legs are used in both contemporary and traditional design schemes. There seems to be no limit to what they can design; if you dream it, they can manufacture it. And Watermark Designs will finish the legs in one of their 38 available finishes. Made from either brass or fused aluminum, these legs have got plenty of kick.

DEVON & DEVON – SERENADE CONSOLE

Serenade's large black fire-clay ceramic top exudes classical and sinuous lines and rests on two "curvaceous" cast aluminium legs. A vertical groove with discreetly "imperfect" finish completes the hand-crafted look. This console also rests "en pointe," giving a nod to times gone by and ultra-chic glamour. It is available with white or black fire-clay ceramic top. Legs available in white or black fire-clay ceramic or cast aluminium with an antique nickel finish. Dimensions: inches 43.31 x 22.44 x 38.98h

DEVON & DEVON – ROSE CONSOLE

Rose draws inspiration from the "bon ton" shapes of the fifties and exquisite, classical lines. The cast aluminium console, with turned brass elements, merges seamlessly with a porcelain washbasin of the same name. It has a large counter top surface that combines the functionality of a marble console with the practical advantages of porcelain. And the structure is enhanced by three towel bars on each side. Legs are available in chrome, light gold or polished nickel finish. Dimensions: inches 30.31 x 21.65 x 34.65h

DEVON & DEVON – CLARIDGE CONSOLE

The legs of this small-size console, with pyramid shaped sections, draw inspiration from art deco. They lend a clean, linear effect to the console's design that's enriched by the white Thassos marble combination. The console features: fused aluminum legs that come in a chrome finish; frame in brass with a chrome finish; top and sides in marble, and a porcelain basin. Legs and frame are available in chrome, white gold and polished nickel finishes. Claridge can also be combined with any marble type specified in the Devon & Devon catalogue. Measurements: inches 36.22 x 20.08 x 32.68h

DEVON & DEVON – MARLENE CONSOLE

The Marlene Console is characterized by its curved form legs that are inspired by the 18th century but executed in a very contemporary style. The addition of the NEW ETOILE sink in exclusive black porcelain makes for a bold and elegant statement. Marlene is made in fused aluminum with parts in turned brass (chrome finish). The console is also available with light gold and polished nickel finishes. The sink is available in white porcelain. Size: inches 27.56 x 20.87 x 34.65

WATERMARK DESIGNS – CONSOLE LEGS

Showing off their manufacturing prowess with legs to match virtually any scenario, Watermark Designs is able to produce legs for consoles as narrow as 24 inches up to a 72 inch double – and in any one of their 38 finishes. This custom capability is what differentiates Watermark Designs from all others and makes them the go-to source for architect and designers.
